TRUCKMOUNT BUYERS GUIDE

Why you should buy from us

Knowledge and ability: There is a reason why Advanced Specialized Equipment (ASE) sell, service, and support more truckmounts than any other supplier in Australia. We can help you prepare your business with the perfectly equipped truckmount.

We have fitted hundreds over the years, from the very basic, to bespoke custom installations. Ensuring that you get the perfect result every time.

Our experience covers fuel tanks, flooring, walls, racking, reels and even lighting.

From our professional, friendly and experienced truckmount specialists to our highly skilled, trained, and experienced installation/service personnel, you will have a buying experience that focuses on you and your needs.

Finance or Rental: ASE can assist you with the financing of your new or used equipment. With competitive rates for start up and developed companies, you will be amazed by our flexible options. We can even facilitate the rental of a van in these challenging times. Let us show you how simple the transaction can be.

Depth and Power: With knowledge comes power, and we can offer an extensive range of parts and accessories to ensure that you are simplifying the task at hand with the latest technology. From carpet and tile, to restoration of flood or fire, we can help you with supplies.

The big decisions

Which model and van: Which truckmount is suited to you and your business?

The services you provide, other truckmounts you own, features that are important to you and how many employees you have are only a few factors to consider. Where you live, where you provide services and even what time of day you provide these services will impact the decision of which truckmount to buy.

You will then need to select a van that fits your machine, and your budget. We can make recommendations on the correct van for each model.

Accessories and Installation: The right set up is crucial to your day-to-day operation. Having the right tools and van layout can save you hours a day. And we all know that time is money in our industry. We have years of experience in this field which will make the consultation a breeze.

Our strengths

Training and Support: We feel that correct use of your new machine is vital and therefore we provide all our customers with an in-depth handover. We then welcome you back for a free service as the next step in our ongoing partnership. We are dedicated to help you be successful in all aspects of your business.

In fact, we are known best for our ongoing support – equipment maintenance, technical assistance, business support, product needs, and even 24hr emergency service. We also encourage all our customers and their technicians to participate in all our relevant training courses.

Which model do I need?

Model	Engine	Vacuum Pump	Solution Pump	Maximum Vacuum Reach	Console W x H x D
SS370	Kawasaki 23 HP V-Twin air-cooled engine	Eurus ZG4006 tri-lobe blower. Vacuum to 13 in. Hg and flows up to 317 CFM.	General HTXS1813S with an electric clutch operating up to 1500 psi and up to 3.57 GPM at 1478 RPM.	1 hose, up to 106m	41 x 97 x 114 cm Weight including full waste tank 721kg
<p>The 370 is the most popular model in the world and ideal for one user. Fits in most standard vans If you plan on running two hoses you should look at the increased power of the 500 or 570.</p>					
SS500	Kawasaki FD851D-DFI 31 HP liquid-cooled engine with digital fuel injection	Gardner Denver Tri-Flow 406 positive displacement blower with vacuum to 13 in. Hg	General HTXS1813S water pump producing 3.5 GPM and up to 1500 PSI at 1450 RPM	1 hose up to 122m. 2 hoses up to 30m each	89 x 101.6 x 119.4 cm Weight including full waste tank 746kg
SS570	Kubota WG972 31 HP liquid cooled cast iron engine	Gardner Denver trilobe Heli-Flow® HF408 helical positive displacement blower. Vacuum at 13 in. and flows up to 455 CFM.	General HTS2016S producing up to 1500 PSI and 5 GPM at 1500 RPM	1 hose up to 152m. 2 hoses up to 46m each	56 x 109 x 127 cm Weight including full waste tank 911kg
<p>Although the 870 might be a better fit if you are focussed on large commercial jobs including stone and tile.</p>					
SS870	Kubota 57 HP liquid-cooled fuel injected engine	Industrial-grade Eurus positive displacement blower with vacuum to 13 in. Hg at 3580 RPM	General Pump delivering up to 5.6 GPM and up to 2500 psi at 1500 RPM (high speed setting)	1 hose up to 183m. 2 hoses up to 76m each	109 x 107 x 135 cm Weight including full waste tank 1,230kg

Layout

What is your preference? While we recommend the rear installation, some clients prefer the side mounted option. Key points to consider are weight distribution and convenience. Here are the most common layouts.
